Ecat International Exhibition Co., Ltd.

- The company has established marketing and service teams in more than 50 countries and regions including China, the United States, Poland, Indonesia, Thailand, Germany, the United Kingdom, Israel and Mexico. It owns locally operated exhibition industrial parks in Poznań, Poland and Las Vegas, the United States, complete with land, factory premises, high-end equipment and transportation fleets. Adopting the model of front-end global marketing plus back-end localized supply chain services, the Group ensures the high-standard and high-efficiency delivery and execution of large-scale international exhibitions.
- With a heritage of 20 years, E-Kai International Group is an international exhibition enterprise. Its core mission is to empower Chinese brands to go global, providing one-stop solutions covering international exhibition organization, overseas business incubation, supply chain integration, exhibition engineering and event planning. In recent years, the Group has undergone strategic upgrading, focusing on building an overseas service platform centered on Indonesia. It independently runs the CIAAF International Auto Parts Exhibition, builds an industrial cooperation hub between China and Indonesia, and supports enterprises with overseas incubation and localized supply chain services, enabling full-cycle empowerment for enterprises from exhibition participation to local overseas settlement.

CIAAF(Zhengzhou)

The 24th Zhengzhou Auto Aftermarket Expo by
Ecat International

SINCE 2005

22 years of dedicated focus on the automotive aftermarket industry.

A comprehensive **B2B** trade platform covering the entire automotive aftermarket industrial chain, originating from auto supplies trading.

Rooted in Central China, using ASEAN as a springboard to create a high-return exhibition platform that satisfies the global market.

Buyer

300,000+

Daily Visitors

100,000+

Events

20+

Background

With 22 years of market presence and a strong reputation, the CIAAF(Zhengzhou) has become a leading industry benchmark. Its regional reach and deep channel penetration attract over 100,000+ annual visitors nationwide, including wholesalers, distributors, retailers, online sellers, OEMs, 4S stores, and traders.

Key Features

CIAAF covers 12 major categories including automotive electronics, beauty & maintenance, modification, lighting, films, interior trims, premium accessories, car wash & detailing equipment, chain franchise, machinery and equipment, automobiles and related services.

In 2026, a new Douyin E-Commerce Zone will be launched. Through targeted buyer programs and digital tools, CIAAF provides precise business matching services for nearly 3,000 domestic and overseas exhibitors every year, facilitating order transactions, new product launches and brand promotion. It is a high-return business platform for manufacturers to maintain existing clients and expand new customers in the mid-year period.

Milestones

2005

Founding

The inaugural exhibition started with sheep shearing product transactions. Leveraging Zhengzhou's superior transportation advantages, it was positioned as a regional auto supplies trade fair.

2020-2022

The pandemic era

As the only large-scale exhibition in the industry held consecutively, it successfully staged three editions as scheduled despite the pandemic. The 19th edition in 2022 adopted an online + offline integrated model, with newly added cloud negotiation and live-stream purchasing services.

2025年

Rooted in the Central Plains and focused on ASEAN

The exhibition scale expanded once again, with more than ten summit forums held concurrently during the event. Joining hands with E-Kai International, CIAAF established official cooperative relations with Indonesian authorities and successfully hosted the 23rd Indonesia International Auto Parts Exhibition in Jakarta.

The exhibition achieved nine consecutive leaps in scale. In 2012, Reed Exhibitions, a world-renowned exhibition group, settled in, marking the first step of CIAAF's internationalization.

Upgrading of exhibition scale

2006-2012

The 20th CIAAF Zhengzhou Show achieved a full recovery in scale, covering an exhibition area of 120,150 square meters, with 3,156 exhibitors, 200,000 professional visitors, and over 100 roadshows and concurrent conferences held during the event.

Post-pandemic Era

2023

Ecat International takes over the overall operation, bringing in 20 years of international exhibition experience and global resources.

Fully operated by Ecat International

2026

Achievements

UFI Certified Exhibition

The CIAAF (Zhengzhou) is officially certified by UFI (The Global Association of the Exhibition Industry), the only global organization representing the exhibition industry.

The UFI certification requires strict audits of key metrics, including:
International exhibitor ratio ($\geq 20\%$), International visitor ratio ($\geq 4\%$)

UFI has nearly 1,000 members across 87 countries and certifies more than 960 exhibitions worldwide.

Three Major Competitions

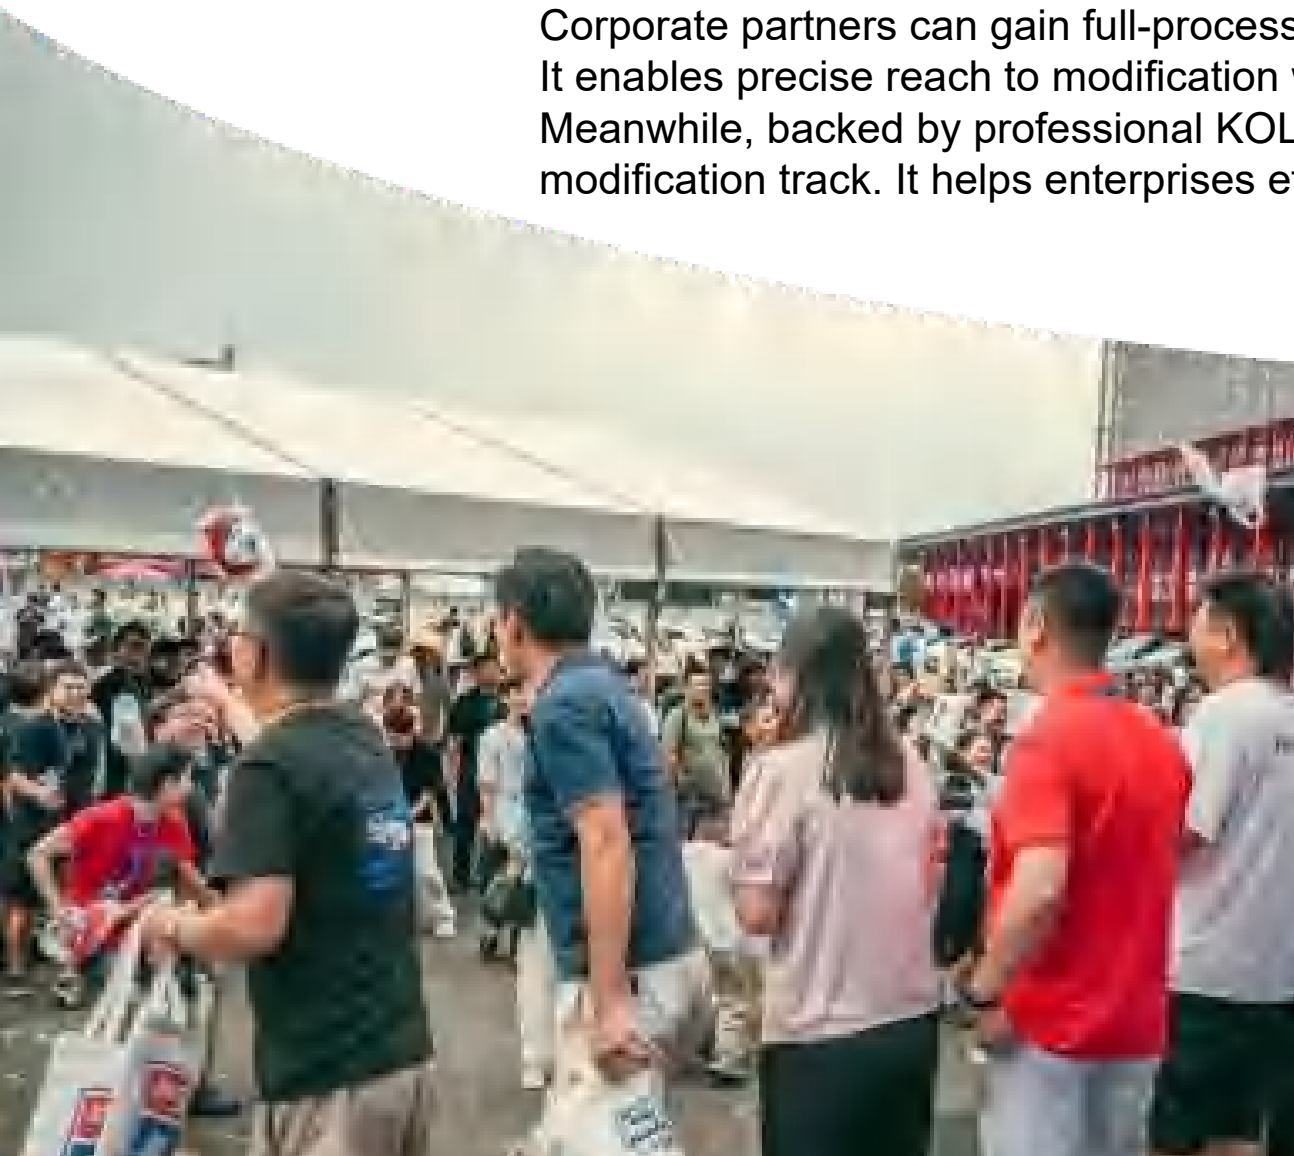

China Auto Modification Culture Festival

Central RevFest Zhongyuan Car Gathering assembles millions of top influencers, vertical industry experts and a matrix of niche community KOLs. It deeply connects core events including car film competitions, audio contests and drift performances.

Corporate partners can gain full-process exposure through KOL resources, covering event commentary, new product evaluations and on-site check-ins.

It enables precise reach to modification workshops, distributors and core car owner groups, driving brand influence expansion and conversion growth.

Meanwhile, backed by professional KOL endorsement, it strengthens product reputation, connects industrial resources, and seizes business opportunities in the auto modification track. It helps enterprises efficiently complete the full chain of exposure – investment promotion – traffic acquisition, achieving win-win new growth for the industry.

Three Major Competitions

Car Audio Competition – Fusion of Sound Wave and Aesthetics

As a high-standard professional competition platform in the automotive aftermarket, the event gathers top international modification workshops, senior technicians and audio enthusiasts for a summit showdown in sound quality, craftsmanship and creativity across the full range of car audio modification. Modification aesthetic showcases such as A-pillar moulding and trunk lighting design are also held simultaneously.

Audiences can immerse themselves in the experience of a mobile concert hall, witness the competition for high-value awards, and communicate face-to-face with industry leaders. For corporate sponsors and partners, it offers full-process brand exposure, precise customer group docking, and product evaluation and display opportunities, helping businesses seize market opportunities in the auto modification sector.

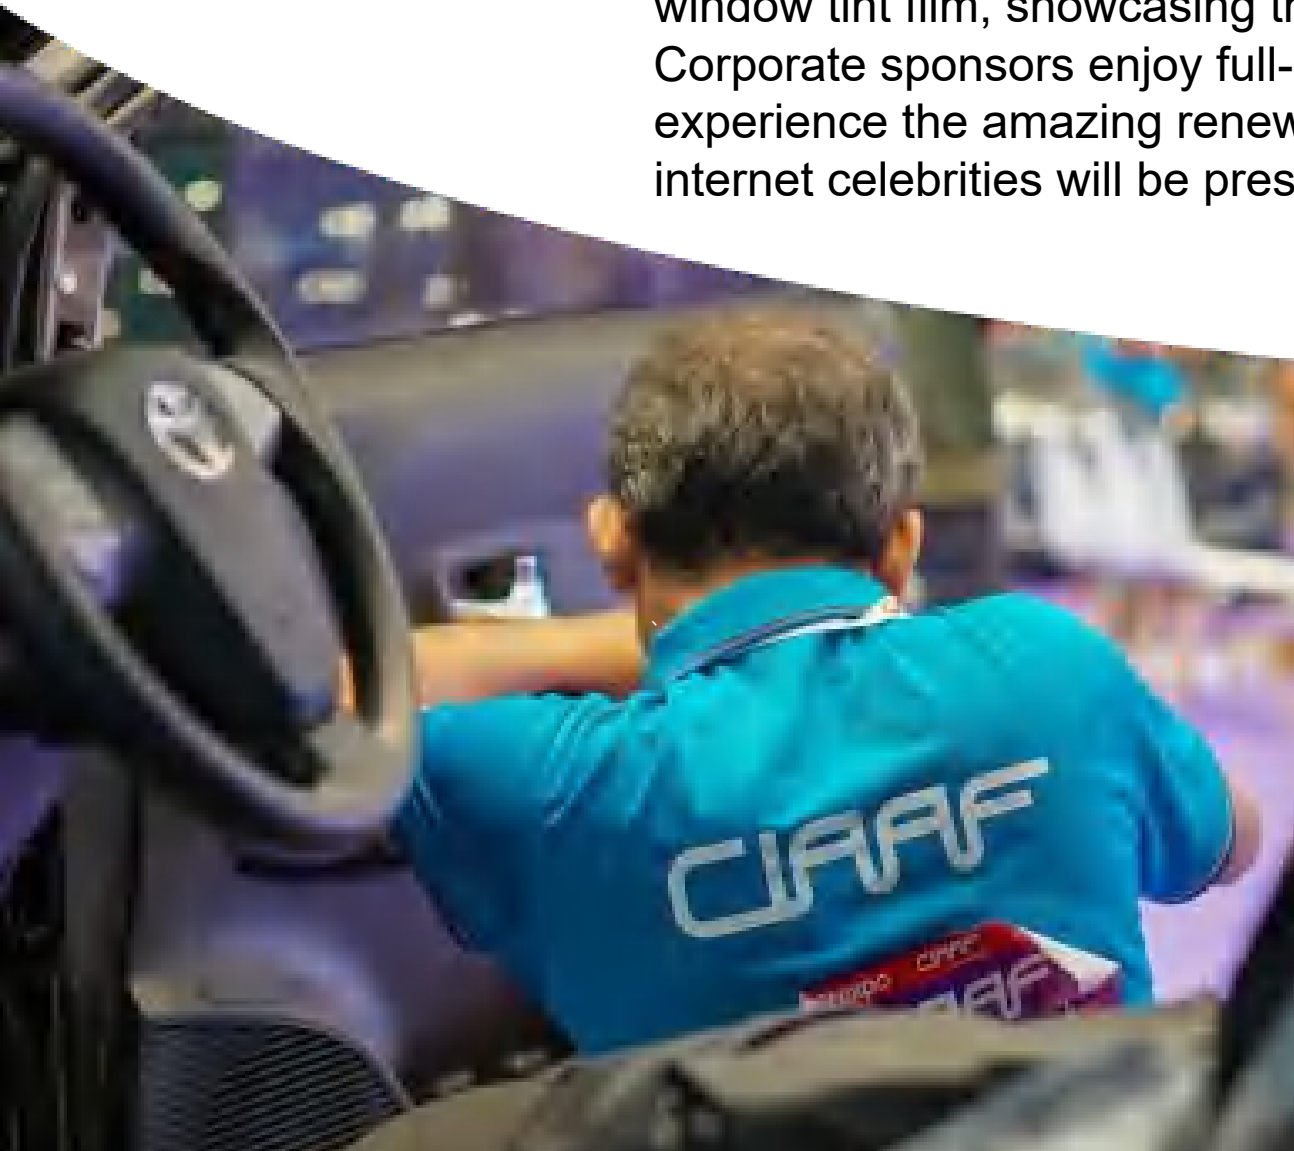

Three Major Competitions

Car Film Competition

Don't miss this grand event! The competition gathers world-class top technicians for a thrilling showdown of paint protection film, color change film and window tint film, showcasing the perfect collision of exquisite craftsmanship and creative design.

Corporate sponsors enjoy full-process brand exposure and precise targeted customer connection to seize market business opportunities. Visitors can experience the amazing renewal power of automotive films up close and exchange professional skills with industry technical experts. Millions-level internet celebrities will be present to create stunning visual highlights.

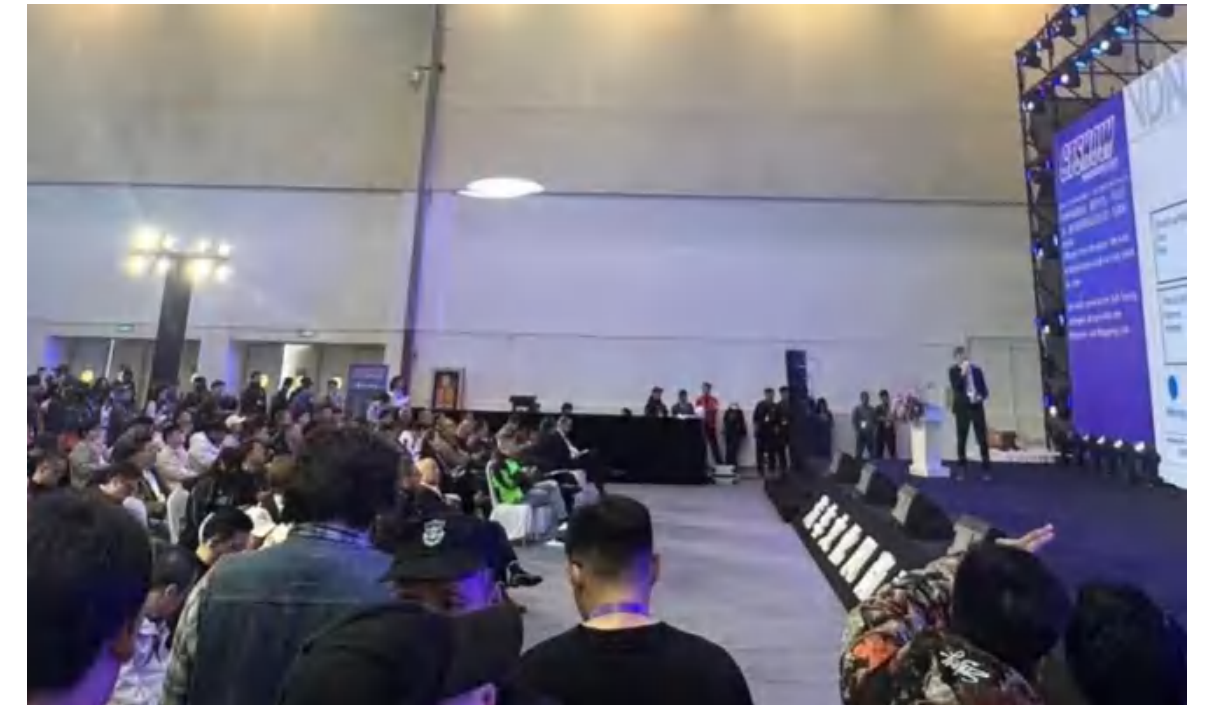

Seven Major Conferences

Gather Momentum in Central China — Ten-Million Club Auto Repair Enterprise Empowerment & Integration Summit

Organizers: CIAAF(Zhengzhou) , Ten-Million Club Scale: 500 + Participants

Leveraging its aggregated resources of automotive service elites, chain stores and industry experts, it injects practical experience in store operation and service upgrading. It enriches the connotation of the exhibition, expands channels for precise customer groups, strengthens advantages in the automotive aftermarket service sector, and elevates the exhibition's professionalism and industry influence. It also supports exhibitors in connecting with high-quality resources, solving operational pain points, and exploring new growth opportunities.

Seven Major Conferences

National Association Secretaries-General Fellowship

Organizer: Federation of Industry and Commerce Auto, Motorcycle & Parts Association
Organizer Undertaker: CIAAF (Zhengzhou) Scale: 200 + Participants

Gathering secretaries-general from 100 chambers and associations, it breaks down industrial barriers through in-depth exchanges and consolidates the foundation for coordinated development. It unites industry consensus and converges development momentum, driving the high-quality growth of chamber & association organizations, and further empowering the upgrading of the entire industrial ecosystem.

The 1st Central China New Energy Technology & Operation Empowerment Summit

Organizer: CIAAF (Zhengzhou) Scale: 1000+ Participants

It integrates high-quality full-industry-chain resources, covering new energy component suppliers, complete vehicle supporting systems, charging facility enterprises, hydrogen energy and energy storage enterprises, terminal service outlets and industry experts. Meanwhile, it collaborates with industry associations, scientific research institutions and policy authorities. Boasting wide resource coverage and high precision, the event achieves coordinated linkage and complementary advantages of exhibition + summit. It comprehensively elevates the industrial value, resource level and industry competitiveness of the Zhengzhou Expo, and builds a core docking platform for the new energy vehicle aftermarket for exhibitors, purchasers and industry professionals.

Seven Major Conferences

4S Store After-Sales System Development Conference

Organizer: Tianjin Automobile Aftermarket Industry Association

Scale: 500+ Industry Participants

The summit provides in-depth insights into industry trends and solutions to operational pain points. It enriches the connotation of the exhibition, strengthens the advantages of the entire automotive aftermarket industrial chain, and elevates the exhibition's authority. It empowers exhibitors to expand 4S store channels and further enhances the core appeal and commercial value of the exhibition.

The 1st Automotive Equipment & Service Digital Intelligence Development Summit

Undertaker: MengKeji Scale: 500 + Participants

Set the keynote for the industry's transformation from manufacturing to intelligent manufacturing and from domestic operation to global layout. It analyzes four core trends including the integration of digital technology and AI, conducts in-depth discussions on pain points such as equipment intelligence and supply chain collaboration, builds consensus for breakthrough development, and focuses on the digital, intelligent and global upgrading of the automotive service equipment industry.

Seven Major Conferences

Sheet Metal & Spraying Development Conference

Organizer: CIAAF (Zhengzhou) Scale: 500+ Participants

Adopting the model of exhibition as the platform and forum as the enabler, we build a dedicated platform for policy interpretation, technical exchange, business opportunity docking and model exploration, injecting new vitality into the high-quality development of the sheet metal and spraying sector in the automotive aftermarket.

Wear Parts Conference

Organizer: CIAAF (Zhengzhou) Scale: 500+ Participants

Interpret the market trends, price cutthroat competition, new energy transformation and new industry policies of the wearing parts sector, and clarify the future development direction of the industry. Share new products, new processes and quality standards of wearing parts such as filters, brake pads and batteries to upgrade industry product cognition. Impart drainage solutions, business operation skills and profit margin improvement methods for wearing parts, helping terminal merchants boost revenue and overall competitiveness.

Professional Media Lineup

Ecat's official new media matrix goes all out across the board. Daily high-frequency releases of exhibition information, exhibition tour vlogs and other content are published on WeChat Channels, Douyin, Kuaishou, Xiaohongshu, WeChat Official Account, Yidianhao, Qiehao, Duandinhao, Daxianghao, Sohu Official Accounts and other platforms, covering audiences throughout the entire automotive aftermarket industrial chain. It conducts pre-exhibition promotion and business matching, and guides visitors to complete online reservations and attend the exhibition offline.

Ecat's boasts an extensive overseas promotion network: its marketing coverage spans more than 50 countries. It releases exhibition-related content daily on global social media platforms including Facebook, WhatsApp, TikTok and YouTube, delivering information to audiences across the entire automotive aftermarket industrial chain.

**Powerful linkage and support from central media,
provincial media and official media**

Brand New 2026 Events
